## DETAILED ACTION

Claims 1-27 and 32-38 are pending in this application.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26, drawn to a method of identifying an agent which modulates 2-oxoglutarate dependent oxygenase activity.

Group II, claim(s) 27, drawn to an agent identified by an assay method.

Group III, claim(s) 32, drawn to a method of treating a condition comprising administering a therapeutically effective amount of an agent to an individual.

Group IV, claim(s) 33 and 36, drawn to a method comprising contacting a cell with a substance that inhibits the asparagine hydroxylase activity of a 2-oxoglutarate dependent oxygenase.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature, a method comprising the steps of contacting a 2-oxoglutarate dependent oxygenase and a test agent in the presence of a substrate comprising one or more ankyrin repeats under conditions wherein the substrate is hydroxylated in the absence of the test agent and determining the hydroxylation of the substrate; is not found throughout all of the Groups.

Art Unit: 1657

For example, Group II is directed to an agent, Group III is directed to a method of treating a condition in an individual and Group IV is directed to a method comprising the step of contacting a cell with a substance which inhibits the asparagine hydroxylase activity of a 2-oxoglutarate dependent oxygenase

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL C. MARTIN whose telephone number is (571)272-3348. The examiner can normally be reached on M-F 8am-4:30pm.
